Data Sheet

victor
Web and Web LT

Key Features

- Access victor from virtually anywhere
- Quickly view and play back video for timely event management
- No additional plug-ins or system updates needed
- Dewarp video from fisheye cameras within the Web Client
- Text streaming integration with POS stations

A Solution That Protects Your Business and Helps it Grow

When you combine the powerful capabilities of victor with the intelligence of VideoEdge NVRs, you reach new heights in video management with actionable insights to save time, money, and lives. Leveraging high-performance smart video searching, video intelligence, and case management along with an extensive feature set, users gain greater situation awareness and save administrator resources.

Conveniently Connect to the victor VMS from Any Browser

Access and monitor a security infrastructure through the victor Video Management System from virtually anywhere. With browser support available on Chrome, Firefox and Internet Explorer, the victor Web Client allows users to quickly view and play back video for timely event management. Search videos from multiple recorders simultaneously and export video clips with a single click. The victor Web Client compliments the victor software by allowing operators to utilize their system from remote locations away from the command center without additional plugin-ins or system updates.

Johnson Controls

Ensure Reliability and Business Continuity with a Cybersecurity Program

The victor VMS has been designed to be resilient against cyber-threats. Our products are gated, analyzed, tested and required to meet or exceed the rigorous standards of the Johnson Controls Cyber Solutions Product Security Program for every consecutive release. This holistic approach is aimed at providing peace of mind to our customers. Our security mindset begins at initial design concept and is supported through deployment, including a rapid incident response to meet the comprehensive and evolving cybersecurity environments.
